PROFESSIONAL EXPERIENCE

Data & Innovation Directorate, U.S. Army Recruiting Command

Chicago, IL

Data Integration Lead

2024 - Present

- Built the command's first unified data environment, integrating over 20 enterprise business systems into automated data pipelines, complete with an application layer for users to interact more easily with products and reports.
- Developed an automated reporting pipeline that supported both internal requirements and external compliance reports provided to Congress and senior government officials; expanded the organization's reporting throughput by 50% and eliminating errors.

A.I. Task Force, U.S. Army Futures Command

Pittsburgh, PA

Product Lead

2022 - 2024

- Scaled a product from concept through MVP to a full stack enterprise software application deployed across multiple classified DOD network levels; enabled more timely access to operationally relevant data at the point of greatest need.
- Led a 20-person cross functional team, with a \$4M annual development budget, driving technical strategy, roadmap execution, and stakeholder alignment; delivered capabilities to government stakeholders 10x as fast as other procurement channels.
- Partnered with the Army CIO to codify industry standard CI/CD practices into policy; resulted in a path to production that supported multiple daily deployments, across classification levels, in the rigid compliance & security framework of the government.

11th Airborne Infantry Division, U.S. Army

Anchorage, AK

Infantry Officer

2017 - 2020

- Coordinated operations and logistics for 500 personnel and \$50M+ in vehicles and sensitive equipment across complex, time sensitive missions; previously led a 40-person infantry platoon, earning a top 5% leadership evaluation.

MIT Lincoln Labs

Lincoln, MA

Engineering Intern

Summer, 2016

- Developed signal processing algorithms for LiDAR and space systems using Kalman filtering and statistical estimation techniques.

TECHNICAL ADVISORY

Swinergy, Inc.

Remote

Technical Advisor

2024 - Present

- Designed and deployed an industrial process monitoring & automated data capture platform in a capital constrained environment; eliminated hourly manual recording, redirected 30 staff-hours per week, and informed Swinergy's full scale system build.

EDUCATION

Carnegie Mellon University

Pittsburgh, PA

Master of Science, Electrical & Computer Engineering

2020 - 2022

- Concentration: Artificial Intelligence & Machine Learning Systems
- GPA 3.75

Master of Information Systems Management

2020 - 2022

- Concentration: Business Intelligence & Data Analytics
- GPA: 3.91

United States Military Academy

West Point, NY

Bachelor of Science, Electrical Engineering · Mathematics

2013 - 2017

- Concentrations: Optical Signal Processing · Applied Mathematics
- GPA: 3.72

CERTIFICATIONS & TECHNICAL COMPETENCIES

Programming	Python · Linux · Git · Typescript · Docker · Kubernetes · Java · $\LaTeX$
AI & Data	Data Engineering · Polars · PySpark · PyTorch · Machine Learning · SQL · R
Certifications	CompTIA Security+ · Palantir Foundry Application Developer · Palantir Foundry Data Engineer
Other	Active Top Secret / SCI Clearance · U.S. Army Ranger School Graduate

HONORS & AWARDS

30 Under 30, Pittsburgh Business Times	2024
U.S. Army A.I. Scholar	2020
Most Outstanding Electrical Engineering Graduate, West Point Class of 2017	2017
Research Published in <i>SPIE Proceedings</i> and presented at <i>Photonics West</i>	2016
